These **black** plastic wheels press-fit onto the 3mm D shafts on many of our motors, including our [micro metal gearmotors](#) and our [mini plastic gearmotors](#), to make a nice drive solution for small robots. The wheels have silicone tires and measure **60 mm (2.36")** in diameter. Two additional mounting holes for 4-40 screws make it possible to use the wheel with several of our universal mounting hubs. The wheels are sold in **pairs**.

Description

These wheels are designed to press-fit securely onto the 3mm D output shafts on many of our gearmotors, including our [micro metal gearmotors](#) and our [mini plastic gearmotors](#). They also work with our [35:1](#) and [115:1 15.5D metal gearmotors](#), as well as with our selection of [Solarbotics metal gear motors](#). The wheels have silicone tires and measure **60 mm (2.36")** in diameter. Two additional mounting holes for 4-40 [screws](#) make it possible to use the wheel with our universal mounting hubs for [3mm shafts](#), [4mm shafts](#), and [5mm shafts](#). The slots in the five spokes allow additional accessories to be mounted to the wheel (e.g. decorations or parts of an encoder system).

60×8mm wheel with tire removed.

The left picture below shows this wheel mounted to a [20D mm metal gearmotor](#) with a [universal mounting hub for 4mm shafts](#). The right picture below shows a slightly larger version of this wheel mounted to a micro metal gearmotor.
